COMMUNICATIONS

The following communication was presented and filed:

and filed:

Detroit, Mich., Nov. 17, 1915.

Hon. James De Young, Mayor, and Commissioners of the City of Owosso:

We have carefully considered the resolution adoated by the Commissioners of your city relative to contract entered into by and between Andrew Geeck and the City of Owosso for the paving of that portion of West Main street in said city between the bridge over the Shiawassee river and the tracks of the Michigan Central Railroad Co., viz: All the present portion of said street which is paved upon the south side of street car tracks and that portion of the street covered by the present pavement on the north side of street car tracks between the tracks of the Michigan Central Railroad and the west line of Howell street, and have had the pavement inspected by a competent

engineer. Mr. J. T. Ladue, who has submitted a written report thereon from which it appears that a few depressions have developed caused by an uneven sand-cushion or improper rolling; that the cement grout had been somewhat removed from the surface and in the crevices between the brick, due to either a poor mixture or too much pressure in flushing the street; that the brick next to the expansion joints show signs of wear due to the fact that the specifications called for the expansion material to be used to within one third of the fact, the pavement only, leaving the edges of the brick along both sides of the join mitrely exposed. No brick were found to be broken or cracked and the pavement is perfectly safe and in a serviceable condition for traffic. He states that the unsatisfactory condition of the pavement is due somewhat to carcless workmanship but more from improper specifications and very incompetent in spection during the construction of same rather than to fault in material.
